VOTE For Americans as the US President to Empower & Free US and Create New Earth NOW

Vote: <https://www.unitedcomputing.com/vote>, Business: <https://www.unitedcomputing.org>

Toughest chronic American/US/world problems

- Huge American living expenses or debts on housing, transportation, food, medical care, elderly care, utilities, entertainment, kid care, education, clothing, activities, and so on
- Huge money/population/power inequalities causing huge problems of all kinds
- Huge national debts out of welfare/defense spendings and huge inequalities
- Poor limited boring survival and living opportunities or experiences of all kinds
- Third world (like) infrastructure/construction in the US, India, Africa, and other nations
- Stock market and government/business corruptions/robberies, political gridlocks, west-east wars, advanced energy/medical technologies, overconsumption, overpopulation, unsustainability, buggy/broken economies, poverty, man-made disasters/plagues/terrors/crimes of all kinds, etc.

Easy empowerment/freedom/New Earth solutions

- ✓ Leverage our super middle and New Earth technical and economic/political innovations to fix those toughest chronic problems easily. Our all-in-one personal computing innovations/platforms are the gates to most businesses/people and most cost effective and efficient mass awareness and collaboration. Our business backs the US government and world instead of special interests. **The US and foreign nations can't fix themselves independently for 100+ years. China led by us can help fix the US/world best** with its political roads/experiences, cost-effective products and resources, best infrastructure/construction capabilities, etc. **Let's open up our minds or think/act out of box** for a much better future.
- ✓ **Vote for Americans or the two most competitive Democratic Conservative governors as the US President & VP now to empower/free us and create New Earth together now.** We are typical or

average independents who voted to empower ourselves, so will Americans. Please help mass campaign our messages to all and contact/follow us for votes/benefits and inputs/updates now.

- ✓ **Pass the laws to shut down the stock market permanently that kills major corruptions/crimes, huge inequalities, and pays off the US debts quickly with (escaped) stock confiscations maybe beginning at 9/27/2023** from the US public businesses and investors. Other nations can do the same along with overpopulation treatment and better economies to pay off their debts. Exceptions may be **the richest** above \$70 billion **can have up to \$1 billion wealth** and the less rich's wealth limits follow certain thresholds or curves with the sustainable total wealth for the rich, and the poor/average suffer big losses otherwise, while most investors' stock shares are confiscated (<https://siblisresearch.com/data/us-stock-market-value/>, <https://www.companiesmarketcap.com/>, <https://www.forbes.com/real-time-billionaires>).
- ✓ **Overpopulation creates all kinds of problems and its treatment is mainly based on planned parenthood and assisted suicides for bad quality people. Our target is 2.5 billion global population.** We evaluate the quality and potential for each person or region and treat them accurately by priority. (<https://docslib.org/doc/4554435/overshoot-index-2016-v2>) With the same eco footprint per nation like 3.4, such as 3.4 for the upper-middle class or China's, each nation's **sustainable equitable population** = its eco footprint / 3.4 x its sustain population, which may take decades to achieve and have varieties or exceptions taking **population qualities** into consideration. India/China/the US ideal populations would be 170/392/350 million for instance. We can leverage our platforms for cost-effective mass awareness and overpopulation treatments, passing relevant laws/policies, etc. Racism may be eliminated by raising white quality kids only globally. English as the first language globally may eliminate language/culture barriers.
- ✓ **Americans are always the US real boss** but tolerate corruptions/crimes on them way too much. **We will actively engage Americans to take power back officially and** leverage their votes/inputs/collaborations along with moderation from independent experts on key systematic projects through our tech and government platforms to **fix the toughest chronic problems easily and efficiently**, also **achieving true democracy** instead of fake two-party democracy for the richest. West-east wars and corruptions/crimes are terminated through reducing money/population/power inequalities and better lives/economies/worlds.
- ✓ The two major political parties are like President Coin and Snow in Hunger Games. Having true democracy in place, we will consolidate the best of two parties into the **Democratic Conservative Party** with competitive leaderships and policies and discard the bad ones **for unity and efficiency**. Conservatives support overpopulation treatment and gay marriage now, and **our projects are mostly conservative ones**, such as homestead, trailers, offgrid energy/medical/other technologies, sustainability, reducing spendings/debts, reducing power/money/population inequalities, New Heaven and Earth, etc. (<https://www.investopedia.com/us-debt-by-president-dollar-and-percentage-7371225>).

- ✓ **Build freedom affordable homes or mobile self-sustainable smart community with some long (~40 feet) farm, utility, workshop, and house trailers** (<https://www.tinyhomebuilders.com>) towed by electric vehicles for up to 10 people, with free off-grid utilities (<https://scarabane.com/>), free major consumptions, and free lands/lots everywhere included (<https://www.realestateskills.com/blog/how-to-find-vacant->

- ✓ **Our mobile communities of diversities and scales also minimize the relocation expenses associated with building New Earth** where many places are upgraded or rebuilt from scratch. **They are like small businesses providing full employment and housing, and well financed** through home buyers/renters, job seekers, travelers, and sales of communities, trailers, and components such as utilities, housing, transportation, food, everyday products, charging, medical care, education, clothing, etc.
- ✓ **With our independent votes and freedom communities, we can take our power back officially and speak or do truly legal/right things freely.** The US and China then complement each other to build **New Earth soft (apps/AI/social/websites/spirits) and hard (infrastructure/construction/physical products) bodies** most cost effectively and efficiently, along with other nations ([search images on duckduckgo for 中国基建, 中国最美城市, 美丽中国](http://duckduckgo.com?q=中国基建,中国最美城市,美丽中国), <http://politics.people.com.cn/n1/2022/1014/c1001-32545391.html>).
- ✓ **Our new self-sustainable smart communities of all kinds will be standalone or isolated from old buggy world**, with key technology classifications and double pricing of appropriate individual items applied for our communities and external world adopting a much slower civilization pace of upgrades upon successful tests and deployments of new communities over time, to minimize the chaos/bugs/risks, following general product or regional/national development and upgrade routines.
- ✓ **We efficiently cost effectively build New Earth and communities** by mobilizing/sharing/managing resources of all kinds locally and globally and building/upgrading/diversifying community templates
- ✓ Since our business is natural monopoly and the gates to most businesses and people, and our other projects/plans share the similar nature, **our business will become private State Owned Enterprise co-led/owned by our business founder, US government, and Americans**, to the permanent and best interests of most businesses, nations, and people. Our business will replace most obsolete/corrupt Alphabet/Apple/Tesla and regulate corrupt others.
- ✓ **Sending our political campaign messages to all American voters' cellphones and the like till they vote w/o inputs is the best and fastest way out for everyone.** We will improve our solutions if needed till we get enough or most votes. Governments should do so for their people independently. We will build and maintain the medium size and grade self sustainable smart governments to minimize corruptions from their employees and operation expenses. **Places voting for us are also where relevant independent policies and innovations can be immediately official and benefiting the public.** They can build mobile self sustainable smart communities and enforce favorable policies there now for instance.
