## Toughest Chronic US/World Problems & Easiest Fastest Cleanest Solutions

**Vote for two most competitive governors as the US President & VP for now/2024/2028 elections to fix the US/world with these super middle and New Earth technical/economic/political innovations:**

- ***People are much less productive with small screen mobile devices and stuck with greedy/criminal tech giants or businesses and multiple big bulky expensive computers and mobile devices for work & play***
  **1. Get Windows all-in-one mobile PC, AR/VR glasses, and accessories, with future upgrades to compute in all body poses/places/times. Use products from technically & politically competitive businesses only.**
  **2. They also facilitate mass awareness/collaboration to fix things most cost effectively and quickly.**
  **3. Replace Alphabet/Apple/Tesla and regulate corrupt others first, then convert our business to private State Owned Enterprise co-led/owned by business founder, US government, and Americans.**

- ***Huge power/money/population inequalities causing huge problems of all kinds, such as huge national debts, corruptions/crimes, poverty, broken/buggy economies/worlds, overpopulation, unsustainability, overconsumption, west-east wars, suppressed technologies, political gridlocks, etc.***
  **1. Leverage the votes/inputs from Americans as the US boss to fix toughest chronic problems easily.**
  **2. Shutdown the stock market permanently and confiscate most (escaped) stocks to pay off US debts.**
  **3. All businesses become private. The richest have $1 billion- individual and limited total wealth.**
  **4. Treat overpopulation in India/China/Africa/Asia/etc. to pay off national debts and do more, and reach sustainable equitable quality population everywhere and 2.5 billion people globally over decades.**
  **5. Consolidate the best of two parties into the Democratic Conservative Party for unity & efficiency.**

- ***Huge American living expenses or debts on housing, transportation, food, medical care, education, clothing, everyday products, etc., and poor/limited/boring survival/living opportunities/experiences***
  **1. Safely free/utilize advanced technologies such as off-grid generators, medical devices, etc.**
  **2. Build mobile/fixed self-sustainable smart communities of diversities and scales, such as land, ocean, consumption, culture, or geology based, also minimizing relocation expenses of building New Earth.**
  **3. Front end provides free off-grid utilities, major consumptions, and lands everywhere. Back end provides best quality, very affordable, sustainable, durable, and partly shareable products, eliminating all the zombie, harmful, obsolete, unsustainable, redundant, and bad quality businesses or productions.**
  **4. Build New Earth soft bodies based on apps/software/websites, AI, social, cultures, spirits, etc.**

- ***Third world (like) infrastructure/construction in the US, India, Africa, and other nations***
  **China and the US complement each other to build self-sustainable smart communities and New Earth hard & soft bodies cost effectively and efficiently, including infrastructure/urban/rural/community renovation/rebuilding/duplication, leveraging China's political roads/experiences, cost-effective products/resources, best infrastructure/construction capabilities, etc., along with many other nations.**
