

# WinAll Defeating Harris/Walz/Vance

Harris/Walz/Vance are backed by Alphabet, Apple, and Tesla our WinAll or Windows phone, tablet, PC, and gaming/AR/VR all-in-one innovations defeat

We can never elect dead/zombie/cancer candidates or businesses only to create, maintain, or expand third world/heroin living hell everywhere with endless super greed equal to super destruction as always proved

Soulless/greedy/criminal as hell Alphabet/Apple are so desperate to live/steal by empowering the worst candidate in the US history Harris with third world hell India/Africa origins and endless Mexico heroins, and backing Tesla/Vance/Microsoft Indian pests with robbing/taking from our philanthropy/giving nature other projects/plans

When we include them, they endlessly rob/commit crimes, and when we don't, they still don't drop out, as solid evidences of **100% robbers/criminals to lose now**

We simply leave out our other projects/plans here since civilizations always move forward without pests/criminals

# Microsoft Spencer Leadership & Our Innovations

- We have been working with Microsoft domestic leadership since 9/2012. However due to various factors like initial overthinking and later Indian/foreign and business competitor pests/robbers/criminals, our communications remain indirect till now
- Because our WinAll innovations helping Microsoft dominate the tech industry again merge gaming/VR/AR technologies with PC industry, and Satya Nadella has irrelevant background so can't drive our key innovations and is responsible for a decade of venom/hell crimes, we must **replace Satya Nadella with Phil Spencer as Microsoft Chairman and CEO**. The most qualified pest free civilized leader can help Microsoft succeed best
- And we need **public recognition of our innovation ownership** as common sense. Robber/pest Satya Nadella never unconditionally resigned and committed many crimes. We can easily defeat him with these measures or voting for Trump backed by us while Nadella kept hurting his elections and lawsuits
- Microsoft founder and original leadership have best records of running the most competitive business and philanthropy organizations. Our business complements its hardware innovation and philanthropy capabilities. **We work with Trump/Republicans to run the US/world efficiently** as a giant global business and philanthropy organization with many branches and its employees being its customers too

# Harris/Walz/Vance Dangers & Trump/Republicans Win Elections

- **Harris or any candidate backed by Alphabet are the worst candidate/business to drop out/close first by logic/truth. All their attacks on Republicans and better Democrats trace back to themselves as Democratic richest holding power with self anti-corrupt disability while deadlocking/attacking better others. They are responsible for all huge crimes of all kinds to pay for by exit/closure first. Everything they say/do is top poison/crime only to create, maintain, or expand third world and Democratic hell/heroin/cancer across the US/globe. They are hated by all and will be killed soon and must pay for its debt first**
- **Harris controlled Walz is same as Biden and Harris/Walz are worse than Biden/Harris, let alone Trump/Vance. Vance has an Indian pest wife and is backed by Indian special interests. Nadella is Indian pest/robber/criminal. They all have Indian/African/Mexico and Democratic cancers/crimes and are far left/right super rats/sharks or extremists 90% Americans naturally vote against, so must lose to our candidates. We must defeat Harris/Walz/Vance by voting for Trump who wants to remove VP/Vance**
- **The Democratic Party is cancer because the Republican Party competitive and making money also spends money more competitively while Democrats lose in both therefore always destruct till its death. It is bankrupt out of Domsday Device crimes/debts for hundreds of years: black slave votes since New Deal, huge unsustainable spending of all kinds, huge national debts, Cold War, 911 terror attacks, 2008 Housing Crisis and Great Recession, Middle East/the US/World Crisis, stock/election robberies/manipulations, terrors, shootings, foreign/deplorable overpopulation, disasters of all kinds including hurricanes, flooding, wildfires, earthquakes, heat waves, snowstorms, tornadoes, pollution, etc, Ukraine/Israel/other wars and spending, Coronavirus and plagues, corporate and super greed, deadlock hell, false flags, Jan 6 riots, faking victims, scapegoating Republicans/Americans, border and migrant crisis, inflation, anti-Israel mobs, high Democratic region crime rates, human nature distortions, spreading cancers, slavery of money/power/house/population/job, self anti-corruption and stress handling disabilities, poisons, mental illness, stupidity, free speech censorship, etc.**

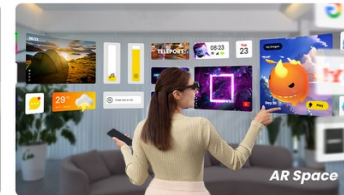

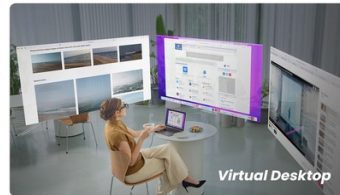

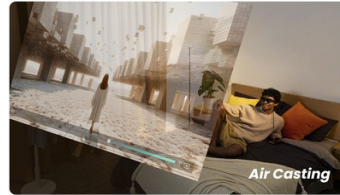

**The Democratic Party is plagued by people of color and deplorables with defective/primitive souls otherwise born in best conditions/places following Law of Cause & Effect. Their core claim of equality is also poison as those successful suffered through past lives/experiences as better leaders. Therefore Trump and Republicans win elections**

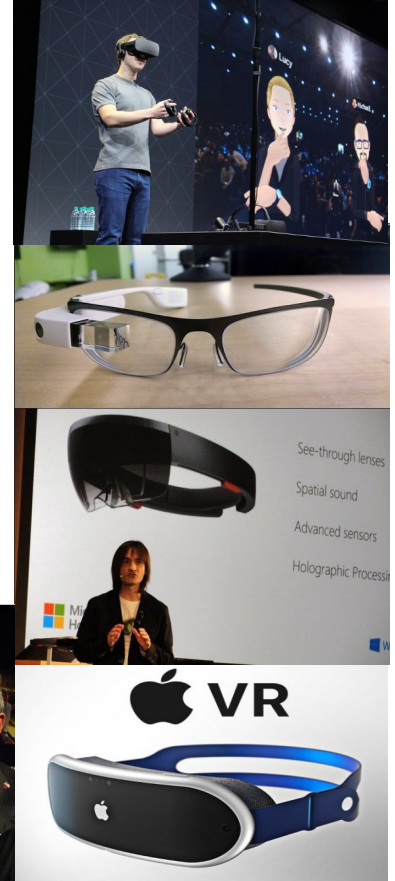

# Windows Phone/Tablet/PC/Gaming/AR/VR All-in-one Products

- People are much less productive with small screen devices and constrained inputs, and stuck with multiple/big/bulky devices for work & play.
- We already have available or easy to build **Windows phone/tablet/computer/gaming/AR/VR all-in-one products to replace Alphabet Android/ChromeOS and Apple iOS/macOS devices now.**
- Alphabet is swallowed by Microsoft/our business and Apple is swallowed by many PC/mobile vendors. Most obsolete/corrupt Alphabet and Apple are dying like what Nokia and Apple became out of iPhone releases and Windows desktop dominance.
- Many people simply aren't aware of these disruptive innovation outcomes already happening. Replace all of Alphabet and Apple now with our Windows alternatives to minimize losses or wastes.

# Our Story

- We began our R&D in the **VR/AR** field off and on since **2001** when the Democratic Party/businesses initiated **911** terror attacks followed by their Middle East/US **Crisis till now**. Back then VR/AR are still a niche market, but we insisted our researches must be widely applicable.
- Traditional PC industry was disrupted by iPhone releases since **2007**, when we had the ideas of merging PC industry with AR/VR technologies after Intel interactions. In 7/2008, we wrote the 20-page **Wearable PC** proposal to remove bottlenecks of small screens and constrained inputs with smartphones and enable lots of 3D/VR/AR applications, while Bill Gates and Michael Bloomberg launched an **anti-smoking** campaign.
- In **2012** we shared our proposals with updates to Qualcomm then to Microsoft in 2013. After that **tech giants** Meta, Google, Microsoft, Apple, Qualcomm, and many other tech companies marketed their VR/AR products, but **all failed** due to bad designs/visions or fierce fruitless struggles over dominant OS and our innovation ownerships.

VS

# WinAll 1 Demo Use Case

- Windows phone/tablet/PC/gaming/AR/VR solutions  
8+ hours daily use for work and play with brief rest intervals

## A. Hardware

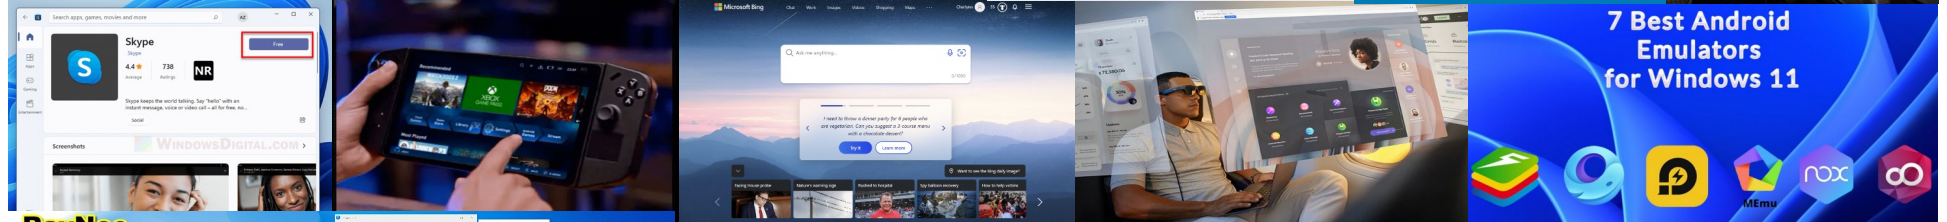

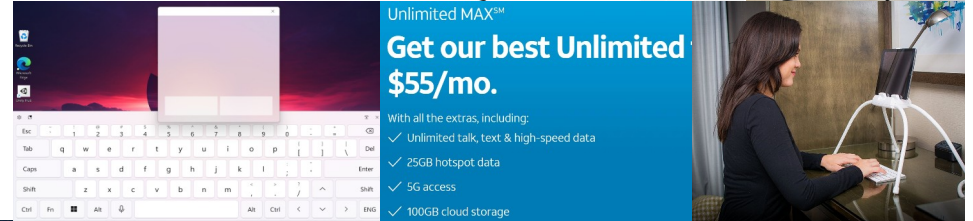

- \$750 Lenovo Legion Go detachable gaming handheld PC
- \$450 Rayneo Air AR glasses w/o prescription lens & Joydock
- DIY simple thin taped steel wire with spiral ends or detachable electric cable neck holder relieving pressures on nose/ears/sides

## B. Apps

### 1. Legion Go (integrate 2 soon)

- 2nd display mode with Virtual Keyboard/Touchpad on 1st display, Mirror Studio, or other XR multi-window/monitor apps
- Android emulators: BlueStacks, Multi-Memu, etc.
- Phone Link, Skype, XBOX/AR/VR and entertainment apps, Bing/VS/Office/Azure and productivity apps, etc.

- 2. Old/cheap phone: AT&T 25GB unlimited max mobile hotspot, Advanced/Bluetooth Keyboard and Mouse, Tablift, etc.

# Microsoft Alternatives to Alphabet Products

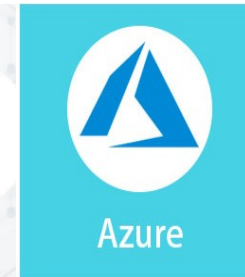

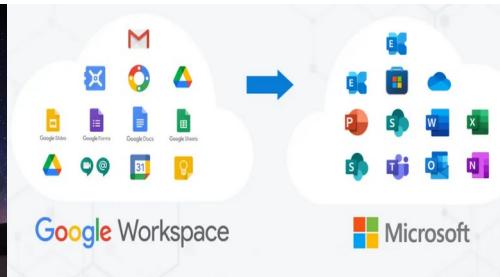

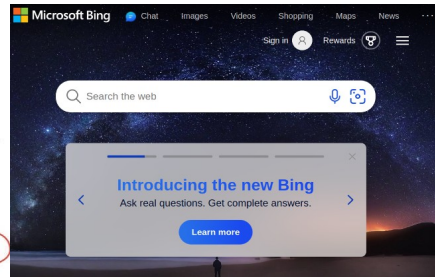

- Google Search => Microsoft Bing Search
- Google YouTube => Microsoft Bing Videos
- Google Cloud => Microsoft Azure
- Google Workspace => Microsoft Office 365
- Google Gmail => Microsoft Outlook, Hotmail, MSN
- Google Android/Play => Microsoft Windows Android Emulators/F-Droid/Amazon Appstore/APKPure
- Google AdWords => Microsoft Bing Ads
- Google Maps => Microsoft Bing Maps
- Google Drive/Photos => Microsoft OneDrive
- Google Chrome Browser => Microsoft Edge Browser
- Google+ => Microsoft LinkedIn
- Google Analytics => Microsoft Clarity
- Google Meet/Hangout => Microsoft Skype
- Google News => Microsoft Bing News
- Google Translate/Duet => Microsoft Translator/Copilot
- Google Note => Microsoft OneNote
- Google Wallet => Microsoft Wallet

# WinAll Future Generations

- **Future OS/hardware/chip/software developments**
- **General R&D directions are based on intuitive immersive interactive VR systems with a high end PC for computing and rendering, and various input/output devices near or attached to relevant human organs, especially eyes, ears, hands, neck, etc. Early VR systems are cumbersome, big, and power hungry with thick wires and other limitations. We make them ultraportable, small, lightweight, energy efficient, wireless, powerful, and robust, and add phone, tablet, gaming, AR, and VR versatile special purpose computing modes to unite and dominate the tech industry. We'll reuse many Hololens components. Future apps/software are more like traditional heavyweight ones with adaptations for 2D/3D/VR/AR intuitive interactions and immersive/resizable displays.**

1. Detachable big/resizable full screen Windows Phone for partial I/O and hooked w/o cable to min PC and provide all smartphone features
2. High end mini gaming PC deeply coupling with Windows Phone
3. Important compact off-grid power battery/generator
4. Windows UIs and apps for phone/tablet/PC/game/VR/AR
5. Detachable mini/wearable versatile keyboard/controller and tablet holder
6. Better XR glasses with waveguide optics, versatile smart neckwear for 2D/3D inputs, partial I/O, power, glasses holder, and wireless, etc.
7. Windows Phone and smart neckwear OS development
8. More intuitive convenient 2D/3D/VR/AR interactions
9. A lot more serious games and VR/AR apps in various domains/fields with relevant development guidance/templates/tools
10. Better or more VR input and output devices and apps

**GPD WIN4 2024**
