

New Earth Better Living Solutions

Improve our living experiences of all kinds

- a. Optimize, restructure, and upgrade our living styles/experiences
- b. Target our environment updates on identified bottlenecks/top priorities
- c. Intelligently manage, optimize, and maximize our positive living experiences and opportunities of all kinds

Daily routine or activity management

- a. Proactive personal AI assistants to manage our lives and daily activities such as wake up, work, go meetings, launch apps, find answers through search, control smart home/environment, etc.
- b. Record the major content of daily work, study, consumption, activities, etc. to track and automatically update personal development statuses or background information and profiles
- c. Record and update the user spiritual development statuses based on intelligent analysis through user activities and backgrounds or profiles
- d. Intelligently and proactively find consumption and production opportunities based on personal development progresses

Career management

Job optimization

- a. Sufficient, intelligent, and proactive job training, tracking, and mutual feedback can reduce the chances of delays, wastes, poor work, or job dissatisfaction for both sides
- b. Many jobs are boring, repetitive, and tedious, where more automation and better designs should be prioritized over other things when possible

New Earth Better Living Solutions

Competition

They're motivated to perform more than just the minimum levels.

They're driven (by fear) to achieve goals which create the perception of increased personal power.

Some employees thrive in highly competitive environments and are happy to outperform others.

Removes complacency by pushing some out of their comfort zone. Striving to be number one requires extra effort and tenacity.

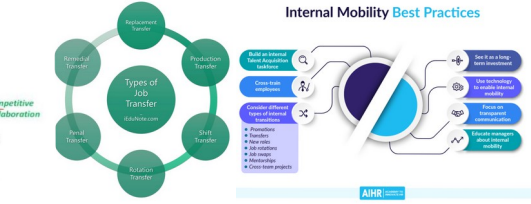

Collaboration

They feel more secure about their jobs thus leading to lower stress levels.

This fosters creativity. As a result, innovation improves because team players are willing to bounce off ideas more openly and freely.

Made improves company-wide because employees are inspired about being at work and contributing qualitatively.

When employees have access to one another's ideas, projects move faster and result in higher quality products and services.

Standardizing jobs, and the titles we use to describe them, is a complex problem that urgently needs solving.

Consistency isn't just a good goal to strive for when working with people data—it's a critical ingredient for effective people analytics, and doubly so when working with AI.

Standardized Jobs

- The degree to which the overall task of the organization is broken down and divided into smaller component parts.
- Benefits of Standardized Jobs:
 - Workers can become proficient at a task.
 - Transfer time between tasks is decreased.
 - Specialized equipment can be more easily developed.
 - Employee replacement becomes easier.

Standardization

- Ensure uniformity
- Improve quality and safety
- Increases productivity and overall efficiency
- Gain competitive advantages
- Attract customers

GoInGlobal
Jobs here, there, everywhere.

c. There are often excessive or unpleasant competitions during work causing significant wastes and drawbacks such as delays, bugs, poor designs, quits/layoffs, etc., which could be reduced through reorientation training and more collaborations or resource sharing

d. People come and go. There are often conflicts, inconsistencies, and different performance levels presented in the same job causing troubles. Certain automated intelligent job analysis/standardization/transfer mechanisms can minimize such risks

Job matching and taking

- Analyze and predict the job market trends based on major business/government innovations or breakthroughs, public needs, and relevant gives such as employment, resumes, profiles, etc.
- Store, update, categorize, and index active or passive job/project/opportunity as dynamic big data
- Based on the user background info, or active/passive gives, rank and match the relevant local/remote jobs/projects/opportunities. Then recommend them to users
- Assist users and employers to apply/accept/offer/onboard jobs by helping with communication, interviews, relocation, etc.

Resource Optimization

The science of selecting the right person for the right position, the right project, the right time, and the right cost.

Take the guesswork out of your resource allocation with ProJobs and find the perfect person for any work assignment in seconds.

The Business Benefits of AI

We project AI revenues will grow faster than the computer and engine technologies that preceded it, reaching \$1.3 trillion by 2035.

1. Driving change in technology, human productivity and the competitive landscape.
2. There's a real AI advantage in how AI can help us solve our most complex problems.
3. Historical trends predict a global AI boom by 2030.

Business Benefits of AI

- Eliminate Redundant, Boring, and Repetitive Tasks
- Optimize internal and external processes
- Reduce the risk of human error
- Free up workers to do more meaningful work
- Make data-driven decisions
- Deliver enhanced customer experiences
- Reduce costs
- Improve productivity
- Optimize and fully use your knowledge and talent
- Reduce risk and increase compliance

Project/job/opportunity creation and entrepreneurship

- Based on user status or active/passive gives/gets and/or the local/remote market demand intelligent analysis, help users generate project/business/job/opportunity ideas and plans
- Train and assist users with the business/job creation, funding, hiring, finance, management of talents/resources, etc.

New Earth Better Living Solutions

Employment/entrepreneurship/project assistance

- Manage the project/job/business for users
- Assist with the project/job/business development/marketing/growth
- Share their status or progress to external sources

Resource sharing

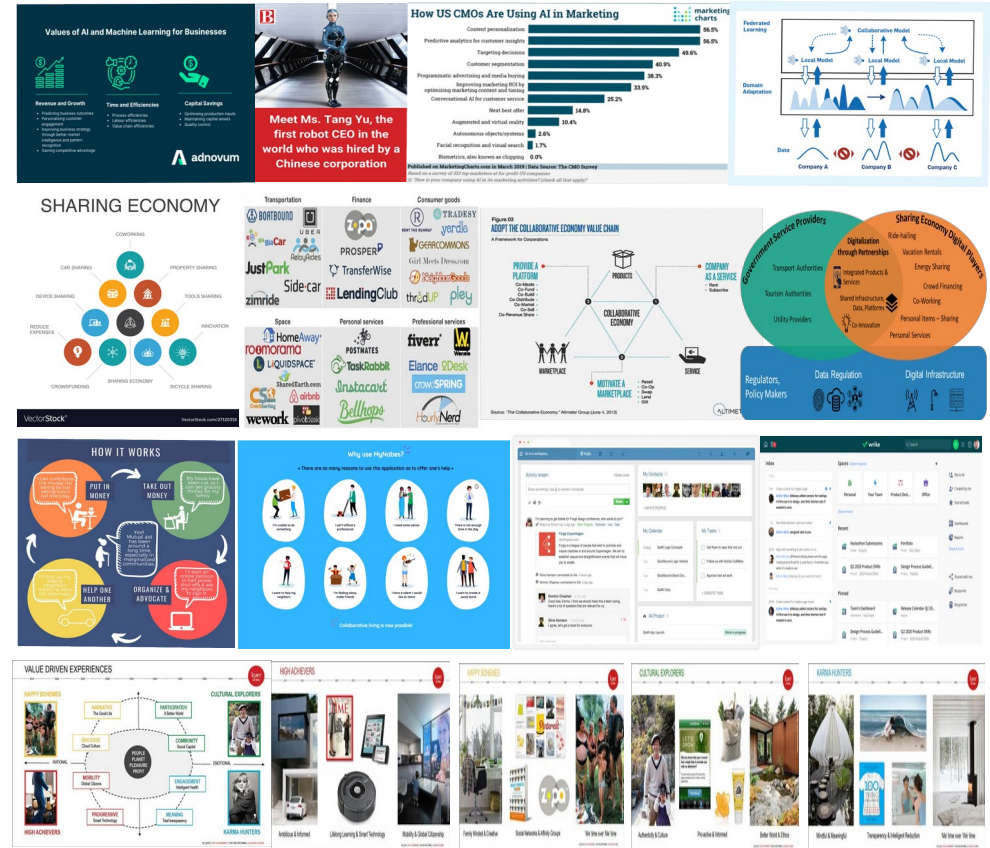

Resource sharing apps to objectively evaluate/score and efficiently intelligently share household or personal items, public resources such as land, energy, water, food, clothes, houses, transportation, healthcare, education, entertainment, etc. and private/public business resources

Mutual help

- Build houses and farms on vacant lands/lots
- Produce other consumer/other products/services together
- Trade services or products
- Manage diverse resources available for many projects to serve participants

Consumption management

- Intelligent proactive consumption management based on personal life styles/goals/backgrounds, such as high achievers, happy behomers, culture explorers, karma hunters, etc.
- Manage consumptions of food, housing, clothing & everyday products, transportation, infrastructure, education, medical care, and activities

New Earth Living Solutions

c. Manage consumptions of kid/elder/disabled/sick care, science & technologies, entertainment & media, social & communications, sports, travel, ocean & space, etc.

Earth 2.0+ Solutions

We Are a 3-Part Whole

Body (Function)
Nerves, Muscles, Bones, Senses, Organs/Cells, Protein, CHO, Fats

Soul (Feeling)
Conscious Mind (Thinking, Planning), Subconscious Mind (Feeling, Purpose, Love)

Spirit (Choices)
Benefits, Attitudes, Emotions, Memories

Our Relationships

We are spirit, have a soul and live in a body

Travel that Transforms You
Body Mind Spirit Journeys is an innovator and leader in sacred and wellness tours

Sustainable Economic Advancement

- Green Buildings
- Smart Education
- Waste Management
- Social Responsibility
- Sustainable Transportation
- Water Management
- Natural Resource Management
- Sustainable Energy
- E-governance
- Smart Health

OVERPOPULATION

WORK HARD DONT BE LAZY

MALL OF AMERICA

- **Upgrade/build/rebuild** diverse self sufficient/reliant/sustainable smart/automated stationary/mobile urban, country, mountain, ocean, or air **communities/cities** of various scales **or help** with farming, productions of all kinds, land/ocean cleanup, sustainability, desert greening, etc. in the cold/desert/normal climate zones **or anything Earth 2.0+ related**
- **Build Earth 2.0+ with the mentioned living solutions** such as personal goals, daily/career/consumption/family/education/search management or new ideas, similar to embedding souls/spirits into bodies to go alive/successful together
- **Utilize the excessive 2/3 of world population** especially Indians, Asians, and Africans for the Earth 2.0+ Project and overpopulation treatment. All people are regulated to work for living
- Majority of them will upgrade/rebuild/build the **Asia/Africa/Middle East/Ukraine/South America** or their own nations. **Second world and above** people will work across **Russia, the US, Canada, Australia, etc.** They and their family members' temporary visas can't upgrade to permanent immigrations
- **China built China 2.0+ and we now build Earth 2.0+.** Reduce assisted suicides or burdens for old qualified Chinese by rehiring them to lead/participate in anti-corruption, infrastructure, construction, overpopulation treatment, etc. Help other **Asians/Africans out of poverty** and relieve social burdens with rotating meaningful/better jobs

Earth 2.0+ Solutions

Build solid global democratic conservative foundations and leaderships and reach Global Earth 2.0+ Agreements

1. Leverage China/Russia to fix third world poorest or far right nations, especially in India/Asia/Africa/Middle East/South America and participate in our business
2. Leverage first world to fix dictator or far left nations
3. Leverage developed democratic conservative or centrist pragmatic parties and nations to fix the worse ones
4. Make global peace & prosperity agreements over above matters and Earth 2.0+ development ASAP among the the US, China, EU/developed, Russia, and others
5. Talented/competitive Chinese Americans/Europeans with both China and the US backgrounds are the top tier world leaders. Democratic Conservative US, China, EU, and developed nations the first tier nations, and Russia and rest of US/EU are the second tier nations
6. Reach Earth2.0+ peace agreements across the first/second tier nations
7. Confiscate the public and the richest above \$1B business/personal wealth and overpopulated wealth over time and transparently build the US/Earth 2.0+
8. Leverage the votes from Americans and the people as the world and nations' top leaders to fix tough problems and build New Earth properly and efficiently

India, Africa, Brazil major issues

1. Corruption, illiteracy, education system, basic sanitation, healthcare system, poverty, pollution, women's safety, infrastructure, unemployment, agricultural distress, and global protectionism rise
2. Poverty, poor education, health, violence, hunger, financing access, too low economic growth rate
3. Democratic threats, speech & information freedom, Coronavirus, public security, military abuses, women rights, climate change, migrants

China's solid strong capabilities & long-term experiences

1. Largest population management
2. Anti-poverty especially for stubbornly poorest ancient regions
3. Infrastructure/construction maniac/resources and cost effective products
4. Anti-corruption and strict self disciplines
5. Lengthy overpopulation treatment
6. Stable centrist pragmatic leadership

Huge benefits for Global Earth 2.0+ Agreements

1. Based on the Universe Law of Divine Oneness, Cause and Effect, etc., investing in others is investing in ourselves
2. With education investment, we have minimized invasive destructive species, English as official language everywhere, trained labors to build Earth 2.0 soft/hard bodies, cleaner/greener/sustainable planet, better lives, etc.

Earth 2.0+ Solutions

- 3. We can efficiently upgrade or rebuild quite old or easily broken infrastructure and buildings everywhere in the US/EU/Russia, third world, etc.
- 4. Chinese may buy consumptions of all kinds with 1/6- money and 1/6 American income. We can improve our living standards with smarter living models
- **Build with 1/3 optimal world population and larger personal spaces in mind. Significantly lower project costs by utilizing large excessive population and intelligently sharing/managing resources of all kinds**
- **Utilize Tesla/nVidia/Meta/other technologies pervasively for Earth 2.0+ planning/collaborations/simulations/optimizations and job training. Store, organize, analyze, process, schedule, simulate, predict, optimize, synchronize, unify, and troubleshoot for all resources, jobs, projects, and targeted regions**
- **TOP PRIORITY 1. Get the phone project done ASAP to kill/jail obsolete expensive or top thief businesses/leaders and build solid foundations**
- **TOP PRIORITY 2. Plan out the optimal execution models to build Earth 2.0+ like global infrastructure maniac and treat overpopulation best with minimal budgets/time while maximizing resource productivity**

- 1) Follow how China designed/planned/built China 2.0+ to train, mobilize, coordinate, and share all resources globally like experts/engineers/workers, new technologies, equipment/tools/businesses/platforms/funding/governments/etc. to build Earth 2.0+
- 2) Leverage self sufficient models to minimize human/work consumption costs by building/integrating communities/cities/regions with each focusing on productions of one or more major human/work consumption types
- 3) Build cheap smart sustainable portable builder towns for different climates and places and add productions of food/energy/water/others while minimizing external dependencies to be more self sufficient/reliant
- 4) Integrate soft components or the soul/personalities and spirit/love into our constructions/infrastructure to become whole/successful
- 5) Attract/motivate people to fund/build/move in our communities/cities/regions or Earth 2.0+ by offering them better survival/living opportunities/experiences
- 6) Establish the global crowd/government/business/individual funding, support, and participation platforms to get funding and share/utilize resources efficiently
- 7) Establish the laws/policies to mandate quality work for living everywhere or get punished/assisted suicides, overpopulation treatment, non-upgradable visas, etc.
