

# The Democratic Conservative Party

## *One Party of Unity and Social Democracy*

- 1) **Removing the far right and far left hell policies** causing huge money, population, and power inequalities, and crimes of all kinds from both parties
- 2) Mindset synchronization over common merits/senses. Democratic Conservative is the US Direction and what most wealthy Europeans are, with small populations and better economies
- 3) **A mixture of the moderate/best conservative and liberal views** and absorbing most moderate Republicans and Democrats or most Americans **into a better single party**
- 4) Beginning by changing the Republican or Democratic Party's name into the Democratic Conservative Party led by Americans, my business, independent domain experts
- 6) **Achieving global unity** as the key for fast global economy recovery and development, **and global social democracy** by removing far right/left policies, telling truths, authentic voting systems, etc.

### **Draft Policies and Guidelines**

#### **1. Abortion, Planned Parenthood, Assisted Suicides**

Ban late abortions for good quality babies in the US, focus on sterilization and pregnancy prevention, cost-effective support/funding for the poor. Pervasive government/media/business support to execute global planned parenthood and assisted suicides for bad quality people of all kinds, such as the super greedy or needy, overpopulated, disabled, very old, retarded, very sick, very lazy and poor, etc.

- 1) Every nation aggressively reach sustainable equitable and quality population
- 2) Assisted suicide pods/services are provided where bad quality people are located
- 3) Good quality families can adopt other kids/people or have white good quality kids when allowed
- 4) More care/assistance for others or the planet and more opportunities/resources for less population

#### **2. Affirmative Action And Language/Culture Barriers**

- 1) Individuals should be admitted to schools and hired for jobs based on their ability. It is unfair to use race as a factor in the selection process
- 2) Promote/enforce birth bans for the people of color in all nations and raise white kids when allowed to eliminate racism
- 3) Adopt English as the first language to remove the language barriers
- 4) Every nation adopts social democracy to remove the culture barriers
- 5) Overpopulation treatment, immigration control, better economies, resource sharing, etc. further address these issues

#### **3. Death Penalty**

The death penalty is a punishment that fits the crime of serious murder (of real humans) or crime. It is neither cruel nor unusual. Executing a serious murderer or criminal is the appropriate punishment for taking innocent lives, removes a bad soul immediately, and saves the prison cost and further troubles.

#### **4. Deficit Reduction**

Long lasting democratic conservative global leadership, sustainable equitable quality population everywhere, intelligent proactive resource sharing/management/mobilization, mobile/fixed self sustainable smart diverse economies, advanced technologies, and better infrastructure/construction, etc. efficiently reduce deficits. Further, we can shutdown the US stock market permanently to terminate this major corruption source causing more deficits. And we will confiscate most stocks to pay off national debts. All public businesses go private then, while the richest have \$1B- individual wealth and total wealth limits.

### **5. Economy**

Under the democratic conservative leadership, execute our economic and technical innovation projects to ethically unite businesses and nations and achieve better economies efficiently together. The government helps regulate key economy sections and protect citizens from corporate, individual, and government greeds or corruption. Free market system with healthy natural competitive capitalism produces better economies efficiently. Private enterprises create economic growth, great opportunities, and high standards of living. Protect American jobs/opportunities/education and require businesses to hire and universities to accept good quality Americans first.

### **6. Education**

We maintain primary public schools and secondary vouchers or charter schools to educate students. Less bad quality population reduces the education related issues such as funding, teacher salaries, and class sizes. We promote/provide the practical versatile education/training and related facilities in major consumption domains for self reliance when needed and reduce government spendings. Home or online schooling/education are promoted for land/ocean/space travels or living offgrid in nature, etc.

### **7. Embryonic Stem Cell Research**

Support the use of adult and umbilical cord stem cells primarily and limited embryonic stem. cells for research.

### **8. Energy**

The US can generally maintain the current status of energy/oil/gas production and consumption. Clean renewable energy is not a top priority right now. Sustainable equitable quality population everywhere can greatly relieve the energy issues. In the standalone sustainable smart economy projects, the governments and businesses may apply cost-effective clean renewable energy solutions, such as free energy generators, solar panels, wind, etc.

### **9. Euthanasia & Physician-assisted suicide**

Euthanasia should be legalized globally, especially in nations or regions with more bad quality population. A person, especially bad quality one, has a right to die with dignity or by his/her own choice. A terminally ill person should have the right to end his/her pain and suffering. Legalizing euthanasia or assisted suicides reduces medical costs or helps relieve everyone and the planet.

### **10. Global Warming/Climate Change**

Sustainable equitable quality population everywhere, and less wars, corruptions, crimes, pollution, energy/meat/other consumption, etc. with less population, coupled with self sustainable smart economies, address this issue efficiently.

### **11. Gun Control and Military Spending**

Prevent bad quality people and potential/existing criminals from owning guns. Social democracy and better economies automatically address gun control and military spending due to job securities, better lives, global peace, less bad quality population, etc. Ban dangerous weapon sales and limit weapon usages mainly for self-defense. Government anti-corruption by removing far right/left domestic/foreign thieves/criminals reduce gun violence, and global peace in progress minimizes military spending.

### **12. Healthcare**

Reduce health care spendings with less bad quality population, assisted suicides, and planned parenthood. Free or low-cost government controlled health care is only accessible to the poor required to work on some government or welfare related jobs to cover the health care cost. Support healthy competitive free market health care system for others. All Americans have access to health care in self sustainable smart economies.

### **13. Homeland Security**

Ban foreigners/immigrants of hell India or very problematic nations from taking executive positions in the US key businesses/government/media. Remove/deport/jail/kill key criminal aliens immediately. Remove/arrest/jail domestic excessive greedy governors/executives/people colluding with criminal aliens or involving in pay to play schemes through stock/economy manipulations. Use passenger profiling and intelligent data for extra airport screening. Deport suspicious or potential terrorists and criminal aliens. Achieve global unity and social democracy to minimize homeland security risks.

### **14. Immigration**

- 1) Support legal immigration of those mostly from developed or good quality nations/regions and a few good quality people to contribute more in the US or escape foreign government corruptions
- 2) Remove all Indian top executives from key US businesses, governments, and media
- 3) Deport illegal immigrants, migrants, dreamers, criminal aliens, and poor performers from bad quality/developing/competing nations or regions
- 4) Secure our borders and enforce current immigration law
- 5) Ban bad quality people in the US from having kids
- 6) Ban citizenship through birth place with none-US citizen/green card parents
- 7) Treat overpopulation and build better economies globally

### **15. Private Property**

Maintain the current status of public properties and private properties except for those used in paying off national debts or building New Earth. Engage more efficient intelligent proactive public/private resource sharing and management to better serve the needs of everyone and the planet without increasing spending/cost.

### **16. Religion & Government**

Support the separation of church and state. There's much less need to go to church by being ourselves as true gods and with Americans empowerment.

### **17. Same-sex Marriage**

Marriage is the union of people who love each other, primarily between man and woman. Support but limit same-sex marriage.

### 18. Social Security

The social security system shall be more flexible, cost effective, or reformed to serve different people better. Some may contribute more, some may delay their retirement ages, its benefits may be reduced/cut approaching/reaching certain ages, some may need less with alternatives, some wealthy may not need them, some may try death wishes or assisted suicides, etc. And it may partner with the welfare program to provide the desired material benefits with reduced spendings. Social security may be more efficient through privatization and allowing individuals to manage their own savings. More importantly, it may align with our projects/plans to reduce spendings while offering appropriate opportunities/benefits/jobs to the retired.

### 19. Taxes

Moderately higher taxes primarily for the wealthy businesses/people and a medium size government are good to address the inequality/injustice issues in our society. Moderate taxes enable the government to create jobs, provide welfare programs for those in need, and reduce our debts. Taxes must be spent in the democratic conservative, transparent, and optimal/intelligent/efficient ways

### 20. United Nations

The UN promotes peace and human rights. The US has the moral and legal obligation to support the UN. The UN Charter gives the UN Security Council the power and responsibility to take collective action to maintain international peace and security. The US, not the UN, is the global force for spreading freedom, prosperity, tolerance, and peace.

### 21. Voting Rights

Americans with 76%+ white over the minimum voting age shall actively participate in voting and give feedbacks to protect, benefit, and empower themselves and maintain a government truly of/by/for the people and long term right US/world leadership.

### 22. War on Terror/Terrorism

Overpopulation/excessive greed/authoritarianism/socialism/terrorism pose the greatest threats to the U.S. Good or ethical leadership, policies, and diplomacy coupled with intelligence gathering and military force are the best ways to deal with them. We will achieve global peace primarily with global unity, sustainable and equitable population everywhere, and democratic conservative leadership, and American empowerment. Terrorists must be stopped/destroyed. Captured terrorists should be treated as enemy combatants and tried in military courts.

### 23. Welfare

Support self-sustainable smart welfare, including limited long-term welfare while minimizing spending and focusing on improving the quality of people and avoiding wasteful/unsustainable spendings on the bad quality or helpless ones, and require the welfare receivers to work for them. Welfare is necessary to bring fairness to American economic life. Opportunities should be prioritized and provided to make it possible for those in need to become self-reliant. The welfare programs are required to benefit good quality Americans first.
